FACULTY.

Rev. BASIL MANLY, D. D.
President, and Professor of Moral and Mental Science.
RICHARD T. BRUMBY, M. A.
Professor of Chemistry and Natural History.
SAMUEL M. STAFFORD, M. A.
Professor of Ancient Literature.
FREDERICK A. P. BARNARD, M. A.
Professor of Mathematics, Natural Philosophy and Astronomy.
JAMES C. DOCKERY, M. A.
Professor of Modern Languages, and Foreign Literature.
LANDON C. GARLAND, LL. D.
Professor of English Literature.
MICHAEL TUOMEY,
Professor of Mineralogy, Geology, and Agricultural Chemistry.
WILSON G. RICHARDSON, M. A.
Tutor in Ancient Languages.
ROBERT S. GOULD, M. A.
Tutor in Mathematics.

SECRETARY,
FREDERICK A. P. BARNARD.

LIBRARIAN,
WILSON G. RICHARDSON.

UNIVERSITY OF ALABAMA.

REQUIREMENTS FOR ADMISSION.

For admission into the freshman class, an applicant must have completed his *fourteenth* year; for advanced standing, he must have a corresponding advance of age. All applicants must produce satisfactory evidence of unexceptionable character, especially the testimony of their last teacher. If they have been members of any other college, a certificate of honorable dismission will also be required. To enter the freshman class at its formation, the candidate must stand an approved examination on arithmetic, geography, ancient and modern, the English, Latin and Greek grammars, Latin prosody, four books of Cæsar's Gallic war, Sallust's Catiline and Jugurtha, the Bucolics and six books of the Æneid of Virgil, Anthon's Select Orations of Cicero, and the whole of Jacobs's Greek Reader. To enter upon advanced standing, an applicant will be examined on all the preceeding studies of the class to which he aspires.

The grammars used in examination of applicants, are Andrews & Stoddard's Latin, and Sophocles's Greek; also, Andrews's Latin Exercises; the arithemetic is that of Prof. Barnard; in all of which, examinations will be rigid. The faculty would state, that applicants are found, almost universally, deficient in elementary branches; in arithmetic, the grammars, and very frequently also in geography. It will not be inappropriate to urge upon parents and teachers the importance of a thorough and faithful preparation, according to the foregoing statement of requisitions.

The classes are regularly formed the first Monday in October of each year. This is the most favorable time for entering. Applicants will, however, be examined at any period during term time, when they may present themselves.

All persons coming to the university, for the purpose of seeking admission, must report themselves to one of the officers as early as the next day after their arrival in Tuscaloosa: and are not at liberty to lodge in the dormitories, until they are regularly admitted.

Students can be admitted to a *partial course* only under peculiar circumstances; such as indigence, advanced age, or infirm health. In all cases of this kind, special assurance will be required of the moral character and habits of the applicant.

COURSE OF INSTRUCTION.

FRESHMAN CLASS.

Term I.

Begins 1st Monday in Oct.

McClintock and Crooks's 1st book in Latin,
Satires of Horace, (Anthon).
Xenophon's Anabasis, 1st book, (Owen's edition.)
Geometry, (Davies) 5 books.)
Elocution, (Caldwell's Manual).

Term II.

Begins 1st Monday in January

Epistles of Horace.
Anabasis, 2d and 3d books.
Algebra, (Hackley,) begun.
Elocution, completed.

Term III.

Begins 3d Monday in April.

Odes and Epodes of Horace.
Herodotus, (Græca Majora).
Algebra, finished.
Ancient Geography.
Mythology, (Eschenburg's Manual of Classical Literature).
English Analysis.

SOPHOMORE CLASS.

Term I.

Geometry, finished.
Application of Algebra to Geometry.
Surault's French Grammar.
Ollendorff's French Exercises.
Horace's Art of Poetry.
Græca Majora, (Isocrates and Demosthenes).
Eschenburg, continued.

Term II.

Trigonometry, plane and spherical.
Mensuration, (Davies)
Juvenal.
Homer's Iliad, begun.
Eschenburg, completed.
French—Vie de Washington
Ancient History, (Tytler).

Term III.

The Andrian of Terence.
Homer's Iliad, continued.
Surveying, (Davies).
Analytical Geometry, (Davies).
Vie de Washington, continued.
Tytler, continued.

JUNIOR CLASS.

Term I.

Chemistry, (Fownes, and Lectures).
Mechanics, Hydrostatics, Hydraulics, (Olmsted).
Tacitus, de Moribus Germaniæ.
Rhetoric, (Newman).
Cicero de Oratore.
Racine.

Term II.

Chemistry, finished.
Pneumatics, Acoustics,
Electricity, Magnetism, (Olmsted,
Homer's Odyssey.
Tacitus, continued.
Racine, continued.

Term III.

Human Physiology.
Tacitus, Agricola.
Greek.
Optics, (Olmsted).
Moliere.
Modern History, (Tytler).

SENIOR CLASS.

Term I.

Mental Science, (Abercrombie).
Zoology.
Astronomy, (Olmsted).
Spanish Grammar, (Sales).
Spanish Exercises, (Ollendorff).
Latin and Greek.

Term II.

Mineralogy.
Astronomy, (Mason's supp't)
Zoology, continued.
Moral Science, (Wayland).
Political Economy (Waylaad)
Geology, (Lectures).
French, (Moliere).
Colmena Espagnola.
Latin and Greek.

Term III.

Botany, (Darby).
Agricultural Chemistry, (Lectures).
Meteorology.
Colmena Espagnola.
Latin and Greek.

The senior class deliver original addresses before the college body, twice in the course of the year; and present English compositions once a month; also Latin compositions occasionally. A portion of them deliver original pieces at their graduation, on commencement day.

The freshman class have a weekly critical exercise in reading and elocution—the sophomore and junior, declaim every Wednesday, alternately. Each of these classes is exercised frequently in translating English into Latin, and in writing English compositions. Translations from the English into French are prepared by the members of the junior class; and French compositions are exhibited by the seniors.

The junior class, or a portion of them, deliver original pieces at a public exhibition, at the close of the year.

The university possesses valuable apparatus in the departments of natural philosophy, astronomy, engineering, and chemistry; also, extensive and well selected cabinets in mineralogy, geology and conchology. The library consists of about 4,400 volumes. A descriptive catalogue, extending to 260 pages, has recently been prepared by the librarian, upon the same plan as the catalogue of the Edinburgh Signet Library. The names of authors are alphabetically arranged, and an index of subjects has been appended, for the use of those who may consult the library. Numerous biographical notices, collated with great care, have been incorporated into the work. The two literary societies in college have libraries of their own.

An astronomical observatory has been erected, and partly furnished with instruments for observation, of a superior order. The building is fifty-four feet in length, by twenty-two in breadth in the centre. The west wing is occupied by a transit-circle, constructed by Simms, of London, having a telescope of five feet focal length, with an object glass of four inches clear aperture. The limb is three feet in diameter, divided to five minutes, and reading by four microscopes to single seconds. The central apartment is surmounted by a revolving dome of eighteen feet internal diameter, under which is to be placed an equatorial telescope, now completed, of corresponding dimensions. Accompanying the transit-circle is a clock with mercurial compensation, by Molyneux, of London.

There, is also, a portable achromatic, by Dollond, of seven feet focal length, and four inches aperture; and a reflecting circle by Troughton, of ten inches diameter, reading by three verniers to twenty seconds.

Instruction in the operations of practical astronomy will constitute a part of the regular course. Portable instruments, in possession of the department, of less size than those above named, increase the facilities of illustrating methods of observation.

For observations upon terrestrial magnetism, a separate structure of stone has been erected, with every precaution to guard against local attraction. The university has imported a declination instrument, and a dipping needle, constructed by Gambey of Paris, in a superior style of finish and accuracy.

Lectures are delivered in course by the several officers.

By an ordinance of the Board of Trustees, adopted in December, 1846, it is provided, "that the Professor of Geology, Mineralogy and Agricultural Chemistry, may be required to spend such portions of his time, not exceeding four months in each year, in exploring the State, in connection with his proper department, as the Trustees may consider for the benefit of the state and the university." In accordance with this provision, the officer above named will undertake an examination of the geology of the state, which will be prosecuted as rapidly as circumstances will permit, and of which the results will be published, for the benefit of the citizens at large.

REGULATIONS AND DISCIPLINE.

The regulations of the university are formed with the single design of promoting the intellectual and moral advancement of its members. They are made public, and may be known by every candidate, before admission. If, at any time, a student become dissatisfied, he is at liberty to withdraw, with every testimonial of scholarship and character to which he is entitled.

The discipline is intended to be strictly parental, and to accomplish its effect by appealing to the better principles of the heart; avoiding, if possible, severe or disgraceful punishment. If it should appear that a student is not susceptible of the influence of such discipline, he will be immediately returned to his friends, in the hope that, under other circumstances he may form an estimable character.

Immoral, disorderly, or dishonorable conduct, habitual negligence of duty, or want of preparation, is always a sufficient reason for directing a student to leave the university.

The students occupy rooms for study in the college edifices. Any student, however, at the request of his parents, can be permitted to lodge, at any private house in the city or vicinity. It is desired that students residing in the city should lodge at home.

An accurate account of the delinquencies of every student is kept, also of the degree of his scholarship, and his attendance and conduct: a proper abstract of which is sent to every parent or guardian, at the close of each term. In case such statements are not received, parents will confer a favor by apprising the faculty.

CERTIFICATES TO TEACHERS.

The faculty are authorized, as each successive freshman class may be formed, to issue a certificate to the teacher or teachers of such students as may have been best prepared for entrance; setting forth the fact of such superior preparation, and expressing the approbation of the Faculty.

The faculty will not feel bound to issue such certificate, however, unless some one or more of those admitted into each class shall have acquitted himself *creditably*, in all respects, after a careful examination on all the studies required for admission.

EXPENSES.

College charges amount to $52 in the course of the year, viz: $26 at the beginning of the first term, and $26 at the beginning of the second. This

amount includes tuition, room rent, library rent, servant hire and fuel. Boarding may be obtained in private families near the institution, at from $9 to $11 per month. The laws of the University require that payment for board shall be made in advance for each term, at the beginning of the term. The books of the course may be purchased, new, in the book-stores of Tuscaloosa, for twenty-one or twenty-two dollars, on an average, for each year. Bedding, furniture and lights, are at the private expense of students. Washing is done by persons in the neighborhood, at $1 50 per month. Repairs of damages done to rooms are charged to the occupants; those to public rooms are assessed on the whole body of the students; the amount of such assessment being less than $1 00 to each for the year, thus far. There are some minor expenses which result from taxes voluntarily imposed by the two literary societies on their members.

The free use of money, or what is worse, of *credit*, is a serious injury to a student. Parents and guardians are earnestly requested to control the matter of expense themselves, as it is beyond the reach of the Faculty. The faculty are decidedly of opinion that, exclusive of clothing and travelling expenses, the ordinary annual expenses of a student need not exceed $250, whether regard be had either to his comfort or his reputation.

One student from each county in the state, if of good character and in straitened circumstances, can receive his education free of the charges paid by others to the university, for tuition and contingencies—provided he is prepared to join some regular class.

VACATIONS—COMMENCEMENT.

Vacations are two: The spring vacation commences on the first Monday in April, and continues two weeks: the summer vacation commences on the Wednesday after the second Monday in July, and ends on the first Monday in October. A short recess only is allowed at Christmas. Students are expected to return to their friends during vacations; and except under peculiar circumstances, they will not be allowed to remain in or near the university at such times.

The distribution of rooms is on the first day of the first term. If a student attend not on that day, he is liable to lose his room.

Commencement is on the Wednesday following the second Monday in July, annually. The annual meeting of the Board of Trustees is on the Saturday preceding.

It will have been perceived that the arrangements of this university presuppose in the student some degree of intellectual maturity, some adequate power of self-government, some decidedly formed feeling of social and moral responsibility. Until the mind and character of a young man be thus far formed, he is too young, whatever be his years, to enter a public institution, with advantage to himself, safety to the institution, or honor to his friends.
